***Allowable Subject Matter***

1. Claims 12-19, 24-27 and 30-41, which have been renumbered as 1-24 respectively allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claims 1-24, the prior art of record fails to teach of forwarding ATM cells between the first client computer system and an ADSL and generating and verifying a HEC field in the ATM cell and entering a sleep state and disabling an activity timer upon receiving a sleep message from the first client computer system and entering a connect state upon receiving a wake-up event from a second client computer system and entering a disconnect state if the poll message is not received from the first client computer system within a predetermined period of time. The closest reference, Davis et al. (U.S. Patent No. 5,896,382), teaches of managing a broadband modem by transmitting a discovery acknowledge signal over a transmission medium in response to receiving a discovery signal from a client system and entering a connect state, but fails to teach of forwarding ATM cells between the first client computer system and an ADSL and generating and verifying a HEC field in the ATM cell and entering a sleep state and disabling an activity timer upon receiving a sleep message from the first client computer system and entering a connect state upon receiving a wake-up event from a second client computer system and entering a disconnect state if the poll message is not received from the first client computer system within a predetermined period of time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
